

Huntsville Bridge

Huntsville, AL

Type: **Curved suspension**
Services: **Conceptual, preliminary, and final design**
Cost: **\$39 million**
Client: **City of Huntsville
City Hall, 308 Fountain Circle
Huntsville, AL 35801**

The Huntsville Bridge will be a long-span pedestrian and bicycle bridge located in downtown Huntsville, Alabama. It will connect the Von Braun Civic Center and Lowe Mills ARTS Center with adjacent residential neighborhoods. The bridge features two elegant towers inspired by the geometry of rockets, which complement its curved design and create a visual balance. This iconic structure will cross over several highways and future canals, which will be landscaped as part of a comprehensive plan to reconnect surrounding areas. Visible from a distance, the bridge will serve as a landmark, marking the heart of Huntsville's downtown. With its multimodal design, the bridge aims to promote sustainable transportation and enhance community connectivity, encouraging residents and visitors alike to explore the vibrant urban landscape.
