

# North Airfield Drive Gateway Bridge

Dallas/Fort Worth, TX

Type: **Steel arches**  
Services: **Conceptual, preliminary, and final design**  
Cost: **\$30 million**  
Client: **Dallas Fort Worth International Airport  
2400 Aviation Drive  
DFW Airport, TX 75261**

The new gateway arch bridge at Dallas Fort Worth International Airport will replace the existing North Airfield Drive Bridge. The new signature structure, consisting of two major arches and smaller connecting deck arch will identify the entrance to airport from a distance and update the airport property overall. The bridge design will also include a striking lighting system and monumental signage that will complement the airport's identity, graphic, and color standards.
